Experience

1/6/2023 - Even today
(Company Developer in ASP and Flutter), Gaza Strip.

Web Development

Training took place in the field of web development during this period, and he learned about the work environment and programs, and work on developing a site for the system, selling game cards, and a conversation project, and so far it is being worked on

03/28/2023 - 30/5/2023
(GTC Graduation Project)

Web Development

During this period, a graduation project was worked on, and the project was scraping on the Internet. The idea of the project is to search international search stations and obtain information in the form of points such as e-mail, mobile number, data colleague, and data description. This process is done by creating a project, each project contains a set of tasks, and each task returns more than one search result. This data is purchased through the payment gateway, and the project is also scalable, like an add-on

1. Create a system for selling data recording Specific class and graduate.
2. Marketing
3. Notification by SMS.
4. Upload this project to a global server to buy from

01/02/2023 - 03/25/2023
(Company Developer in ASP and Flutter), Gaza Strip.

Flutter Mobile

Mobile application developer with a lot of experience in developing mobile applications and making them more interactive.

And in this company, work has been done on the application of operators, and the idea of this application was to help women book an appointment for hairdressers, so that payment is also made through the application, and what you will do is determined, and this facilitates the application process for booking an appointment, and this is an application from its inception design until the application was uploaded to Google Play. It was done with the company team and it was done.
